

Currong Apartments Tree Assessment

Tree ID	Species	Height	Canopy Dia.	Trunk Dia.	No. of Trunks	Health G,F,P,D	Value E,H,M,P,L,D	Tree Act Y/ N/ NA	Tree management notes- K=kino, DW=deadwood, OC=occluded fork,EPI=epicormic growth
301	Quercus palustris	18.5	12	1.53	1	G	H	N/A	Little to no DW, excellent form and colour change in current season. Good structure and foliage.
302	Ulmus parvifolia	4	5	0.4	1	F	L	N/A	Wide spreading canopy, minor DW. 2nd trunk lopped at GL.
303	Fraxinus oxycarpa	9.5	9	0.98	1	F	L	N/A	Large volume of understory SW, some dieback.
304	Quercus palustris	13.5	8	1.1	1	G	M+	N/A	Close proximity to T305, some DW lower limbs where canopies overlap, otherwise good form. Some DW present.
305	Ulmus parvifolia	9	8	0.96	2	G	M	N/A	Close proximity to T304. Some lower limbs. DW where canopies overlap. 2 trunks entwined, attractive appearance
306	Ulmus parvifolia	8.5	9	0.9	1	G	L	N/A	Minor basal shoots, some minor DW. Well balanced form overall.
307	Quercus palustris	13.5	10	1.28	1	F	M	N/A	Possum in lower branches x 2. Lower limb DW and many finer lower canopy branching as DW. Form ok.
308	Quercus palustris	9	7	0.83	1	F	L	N/A	Minor DW and some dieback, branching somewhat contorted.
309	Fraxinus oxycarpa	8	8	0.98	1	F	L	N/A	Scarring on trunk at 2m from major limb loss. Minor DW in lower canopy, good foliage cover.
310	Fraxinus oxycarpa	8.5	8	0.92	1	P	L	N/A	Basal growth, epicormic shoots, 30% DW and DW lower limbs.
311	Fraxinus oxycarpa	9.5	10	1.15	1	F	L	N/A	30% DW and limbs, branch snapped off. Unbalanced form.
312	Quercus palustris	12.5	12.5	1.25	1	G	M	N/A	Well balanced form and foliage cover. Minor DW in lower canopy.
313	Eucalyptus mannifera	10	5	0.74	1	G	L	N/A	Semi mature tree, good form overall with no features of notable comment, multiple carvings in lower trunk.
314	Prunus cerasifera 'nigra'	7	8	0.95, 0.44, 0.45	3	F	M-	Y*	Y* by virtue of multiple trunks. All specimens showing some level of deterioration + DW. T314 & T315 are multi-trunked below 1m above GL. Minor basal shoots.
315	Prunus cerasifera 'nigra'	6	6	1.1	1	P	L	N	
316	Prunus cerasifera 'nigra'	5.5	5.5	0.42, 0.27, 0.32	3	F	L	N	
317	Eucalyptus mannifera	17.5	8	1.4	1	G	M	Y	Minor DW , tall slender form and narrow canopy. T318 recent limb loss.
318	Eucalyptus mannifera	16	6	1.06	1	G	M	Y	
319	Fraxinus oxycarpa	4	3	0.3	1	G	L	N	Small juvenile tree, good form.
320	Fraxinus oxycarpa	11	5	0.76	1	F	L	N	Pyramidal form with good habit, minor DW throughout.
321	Fraxinus oxycarpa raywood	7.5	8	0.74	1	G	L	N	No special outlining traits. Good form and habit. Minor DW.
322	Fraxinus oxycarpa raywood	7	6	0.5	1	F	L	N	All similar features and status. Reasonable form with some minor DW. Pollution build-up blackened trunks.
323	Fraxinus oxycarpa raywood	6.5	3	0.36	1	G	L	N	
324	Fraxinus oxycarpa raywood	7.5	6.5	0.64	1	G	L	N	
325	Fraxinus oxycarpa raywood	12	10	0.92	1	G	M	Y	Little to no DW, good form, well balanced and foliage cover.
326	Fraxinus oxycarpa raywood	10.5	7	0.68	1	F	L	N	Unbalanced form from larger T325 nearby. Basically half a tree in terms of limbs and foliage cover.
327	Eucalyptus mannifera	17	8	1.31	1	G	M	Y	Tall slender specimen with narrow foliage habit, minor DW.
328	Catalpa bignonioides (Indian bean tree)	14.5	11	1.6	1	F	M-	Y	All have slight lean to trunk and habit overall. Scars and wounds to all lower trunks or at base. Minor DW.
329	Catalpa bignonioides (Indian bean tree)	14.5	10	1.45	1	F	M-	Y	
330	Catalpa bignonioides (Indian bean tree)	12.5	9	1.31	1	F	M-	Y	
331	Aesculus species (Horse chestnut)	9.5	7	0.83	1	F	L	N	Minor DW, form ok but no major features.

Currong Apartments Tree Assessment

332	Cupressus glabra	9.5	9	0.51, 1.23	2	F	M-	*Y	Slight lean to trunk, prune lower limbs for clearances beneath. Minor scars to trunk.
333	Liquidamber styraciflua sp.	14.5	9	0.9	1	F	M-	Y	T334 very good specimen and best of group. T333+T335 reduced canopy and form due to larger T334. Also contain greater DW. T334 has little to no DW.
334	Liquidamber styraciflua sp.	15	12	1.2	1	G	M+	Y	
335	Liquidamber styraciflua sp.	12.5	8	0.83	1	F	M	Y	
336	Betula pendulata	12	8	1.1	1	F	M-	Y	DW and minor dieback occurring. Overall ok.
337	Crataegus sp.	4	4.5	0.38, 0.37	2	F/P	L	N	Stunted growth, some DW. Berries and thorns present.
338	Fraxinus oxycarpa	9.5	9	1.26	1	P	L	N	Sparse foliage as overshadowed by larger surrounding trees. DW present.
339	Fraxinus oxycarpa raywood	14.5	8	1.38	1	F	M	Y	T339 some lower DW limbs but good form and habit overall. T340 minor DW, broad canopy with good foliage. T341 slender canopy and younger tree, struggling against larger tree surrounding. Some DW present. *All have lopsided canopies due to close proximity to building. & 343 best specimen of group.
340	Fraxinus oxycarpa raywood	14.5	8.5	1.12	1	G	M	Y	
341	Fraxinus oxycarpa raywood	12	6	0.75	1	F	M-	Y	
342	Fraxinus oxycarpa raywood	18	9	1.5	1	G	M+	Y	
343	Fraxinus oxycarpa raywood	19.5	10	1.7	1	G	H	Y	
344	Cupressus leylandii	6.5	5	0.79	1	G	L	N	Slight lean to trunk, canopy has minor uneven form from large trees nearby.
345	Fraxinus oxycarpa raywood	11	9	1	1	G	L	N	T346 DW and dieback occurring, poorest of group. T347 well balanced form with dense canopy.
346	Fraxinus oxycarpa raywood	11	8.5	1.1	1	P	L	N	
347	Fraxinus oxycarpa raywood	11.5	9	1.15	1	G	L	N	
348	Fraxinus oxycarpa raywood	6	7	0.73	1	G	L	N	Minor DW, well balanced form.
349	Ulmus americana	19	26	2.65	1	G	E	Y	Branching to east only as located near to building. Broad canopy spreading with minor DW. Some minor epicormic shoots on main limbs.
350	Sophora japonica	13.5	13	1.1	1	F	M-	Y	Generally good vase shaped form. DW limbs and DW occurring across all specimens. T350 spreading as beneath canopy of T349
351	Sophora japonica	13.5	8	1.1	1	F	M	Y	
352	Sophora japonica	14	11	1.63	1	F	M-	Y	
353	Prunus sp.	6.5	5.5	0.7	1	P	L	N	Both with limb tear, breakage and decay. Poor form, minor basal shoots.
354	Prunus sp.	9	8.5	0.8	1	P	L	N	
355	Cupressus glabra	7.5	8	1.2	1	G	L	N	Kino occurring at every limb joint to trunk. Hollow in trunk at 2m where limb torn out. Form ok overall.
356	Quercus palustris	6.5	6.5	0.6	1	G	L	N	All specimens semi mature trees, well balanced and good form overall with no features of notable comment
357	Quercus palustris	5.5	5.5	0.5	1	G	L	N	
358	Quercus palustris	4.5	4	0.35	1	G	L	N	
359	Prunus sp.	2.5	2.5	0.1	1	D	D	N	Majority DW, leaf present on 1 limb only.
360	Ulmus americana	18.5	33	2.66	1	G	E	Y	Exceptional tree. Very wide spreading limbs, light cast beneath is soft. Birds nest, roots exposed and wrapped around base slightly.
361	Prunus sp.	6	5	0.62, 0.55	2	P	L	N	90% DW, poor form.
